## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior arts in the record fail to disclose a wireless system comprising delay determination node for determining delay characteristics of each of the first and second channels and for causing an insert packet to be transmitted on a slower of the first and second channels at predetermined intervals to increase an average time delay associated with both the first and second channels and to thereby minimize a number of packet time outs on the first and second channels within a structure of the independent claims 1, 8 and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Phillips (USP 6118765) discloses a method and system for communicating between the base station and terminal in TCP communication session.

Chen (USP 6529527) discloses method and system for communicating between the base station and terminal using DCCH and SCH.
